

## Web-King Insole Milling Machine 770

The Web-King Insole Milling Machine 770 is the latest technology milling machine which is on the market. The Web-King insole/orthotic milling machine is **online controlled** by the milling (CAM) program. This makes the production of the designed insoles very efficient.

The Web-King insole milling machine, is the most sold model of the Web-King insole milling machine series. This CNC standard 3-axle milling machine features a **servo motor** and large manoeuvre space. Two insoles can be milled at the same time. The large room makes it also possible to mill any insole and material. The machine can be fitted with a vacuum pump to keep the insole blanks in place while milling. The machine takes approx. 8 minutes for milling a pair and has a maximum capacity of approx. 7 pairs per hour.

The machines are connected to the Web-Cad Insole Creator program which makes it possible to directly retrieve and mill the orders which are made.

## Flexam workbench for insole milling machine

This worktable is especially suited for working with the Web-King Insole Milling Machine 770. The worktable is 200 cm width, 90 cm deep and 100 cm in height. On the top part of the table there is enough space for the milling machine, computer screen and keyboard. The unit has central power and air connection and an integrated dust extraction system. The unit can be fully custom made.

### Advantages online Insole Milling Machine 770:

- **Accessible:** because the system is online, you can mill from any location
- **Secured:** all data is online stored, backedup and secured on your account
- **Updates:** always up-to-date with the latest software version because of the direct online updates
- **Timesaving:** mill your insoles/orthotics on a simple and efficient way because of the professional servo motor and vacuum system
- **Professional:** with servo motor
- **Efficient:** large manoeuvring space, two insoles can be milled simultaneously.
- **Flexible:** any insole and material can be milled

### Advantages Flexam workbench:

- All tools and materials within reach
- Compact but well organised
- With spacious storage room
- With central power connection
- With air connection
- Integrated dust extraction system
